THIS WORK AND PRSENTATION IS DEDICATED TO:

- A very hard working farmer, in his memory I undertook this project as a tribute/homage to his unmatchable contributions to my life and had planted seeds for my growth of what I am today.
- Whose company and preaching/philosophy I loved and hence wanted to be a farmer.
- A man who used to teach me by examples and stories rather than just preaching, a greatest teacher in my life.
- A man who had taught me what is farming when I was young.
- Who had given me seeds of grains, legumes, date and wood apple/*supari* to plant, watch how they germinate and how long it takes them to germinate.

THIS WORK AND PRSENTATION IS DEDICATED TO:

- Who used to asked me countless things to think over and not to accept routines.
- Who used to ask me hundreds of questions like: Why the sickle is curved and has teeth, why I go to temple with him…..
- Who made me think, think differently and keep on thinking and keep on searching for answers and still keep on looking for even better answers. Who knew that there is no one solution to a problem.
- Who used to ask me to see the same thing differently.
- Who gave me the freedom to be whatever I want to be and fully supported me in my decisions.

THIS WORK AND PRSENTATION IS DEDICATED TO:

My father: Late Nathalal Patel

THANKS
