Dear Julia,

We have recently completed the purchase order of 8,000 RADTriage-50, ordered by the Israeli Ministry of Defense.

We would like to express our sincere gratitude for the excellent work performed by you and the JPLabs team. Out of 8,000 units we have rejected for minor imperfections only six items, indicating an outstanding quality assurance process.

We can conclude that this work was performed in the highest standards and we wish to express our gratitude for that.

We look forward to continue our cooperation in the future.

Sincerely yours,
Dr. Guy Robin, CEO
Moran Bodas
