Re-Purchase Order for RADTriage in Israel

Dear Gordhan,

It is with great pleasure that I inform you of a new pending purchase order for RADTriage dosimeters for Israeli first responders.

As you recall, the Israeli Ministry of Defense, following rigors examinations, decided to acquire a stockpile of RADTriage dosimeters. These dosimeters were successfully deployed and used over the past two years by thousands of Israeli first responders, with widespread satisfaction.

Since the current stockpile is expiring, we were notified by the Ministry of Defense that they are interested in replenishing part of the RADTriage stock.

We can expect this PO, and we will notify you of it as soon as we receive it. We kindly ask that you make necessary preparation in anticipation of this order.

Sincerely,
Dr. Guy Robin, CEO
